CS 116
Module 9

Professor Michael Terry

New text from Curtis:
Sup. Didn’t see you in class. You sick?

New text from Mark:
Yeah. Love sick

New text from Curtis:
Maybe she'll change her mind

New text from Mark:
Don’t think so. Look what she sent me:

```
def calculate_chance():
  pass
print “Chance we’ll get back together:”, \
calculate_chance()
```

New text from Curtis:
Wow, her sophistication with Python is really improving

New text from Mark:
I know, we were such a good match

New text from Curtis:
You need to get out there again

New text from Mark:
Can't

```
lomf   # <- list of mutual friends
friends_tina_got_in_breakup = lomf[:]
friends_i_got = lomf[0:0]
```

New text from Curtis:
Alright, time to stop feeling sorry for yourself. Let's go dancing

New text from Mark:
You know I can’t dance

New text from Curtis:
Doesn’t matter. Just wear something ridiculous and have fun

New text from Mark:
Ugh… OK
